

Full Stack Web Development

Week 1

- HTML,CSS
- Responsive Design
- JavaScript Basics

Minor Project I

Week 2

- DOM Manipulation
- Frontend Framework I(Angular.js)
- Frontend Framework II(React.js)

Minor Project II

Week 3

- Databases(SQL, MongoDB)
- Authentication & Authorization
- Backend Framework(Node.js)

Minor Project III

Week 4

- Designing of Major Project.
- Deployment of Web App (Heroku, Git Hub)
- **Final Major Project**

Learning Outcome: Full-stack development encompasses proficiency in both front-end and back-end technologies, enabling you to build complete web applications independently. Additionally, you'll gain skills in working with databases, server management, version control systems, and deployment strategies. Overall, mastering full-stack development equips you to create dynamic, responsive, and scalable web applications from start to finish.
